- Cross Platform Access
- Auto Audit and Accounting
- Detail Report and Chart.
- Digital Menu - Scan to order

Cost Effective

- Cost efficient and easy to maintain.
- One installation Covers more than five locaion with the same or different design and database

iLODGE POS System

Integrated PMS with Bar and Restaurant Management:

- Centralized Operations: The PMS integrates with the bar and restaurant systems, allowing seamless management of reservations, orders, billing, and inventory. This helps staff to quickly process orders, track stock levels, and manage dining reservations from a single interface.
- Guest Experience: Charges from the bar or restaurant can be directly added to a guest's room bill, simplifying the checkout process. Guests can also make reservations for dining directly from their rooms or through mobile apps.

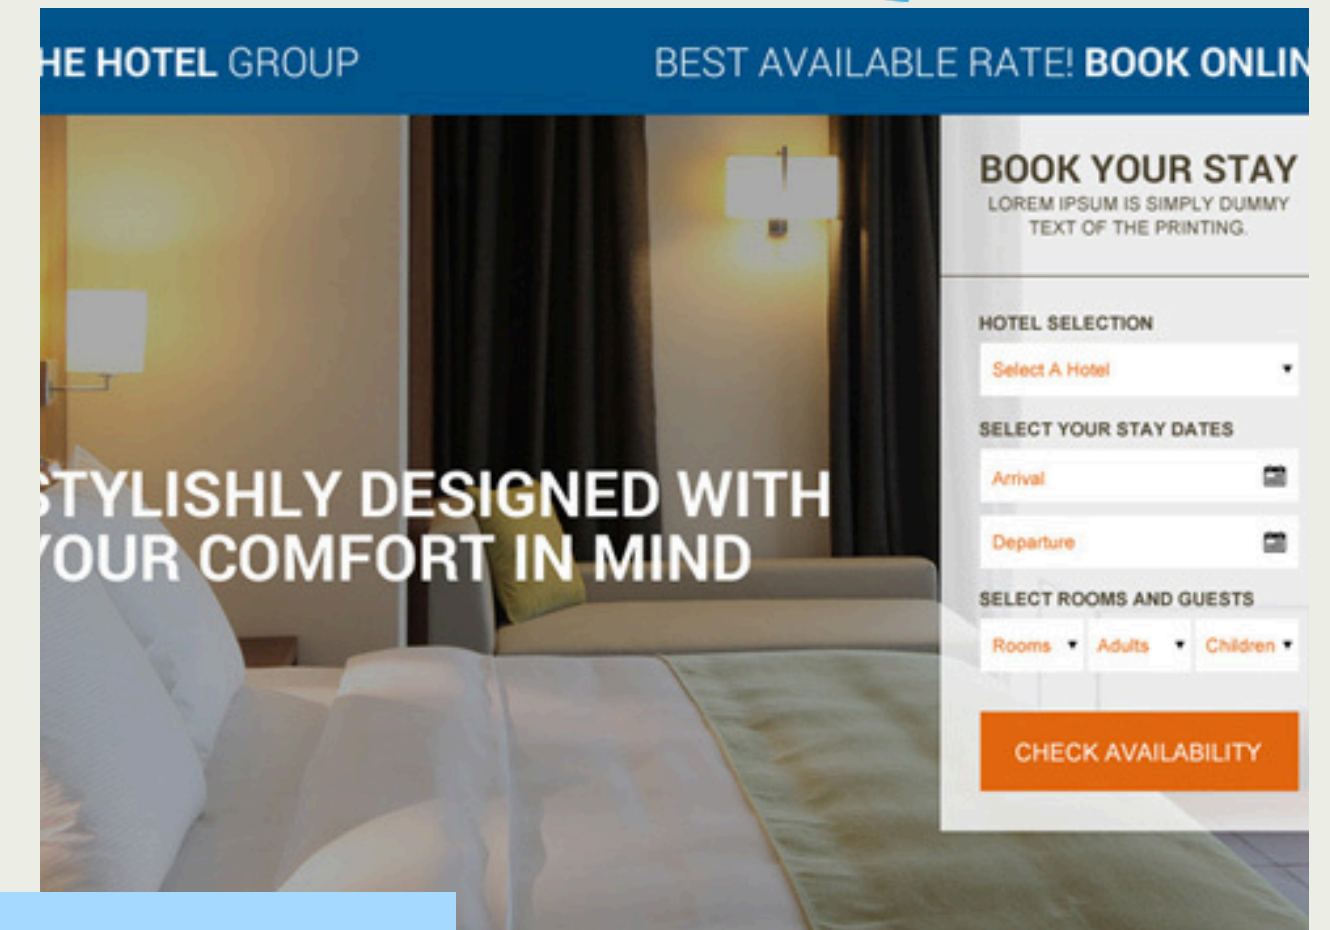

Digital Menu:

- Interactive Menus: Digital menus, often accessible via tablets, kiosks, or smartphones, allow guests to browse food and drink options, view detailed descriptions, and even customize orders. This reduces the need for physical menus and provides real-time updates on available items.
- Upselling Opportunities: The digital menu can suggest pairings, special offers, or upgrades, increasing the average order value.
- Contactless Ordering: Guests can order directly from their devices, which enhances convenience and safety, especially in a post-pandemic environment.

HOTEL WEBSITE WITH ONLINE BOOKING

We design a hotel website with online booking which enables users to view room availability, make reservations, and complete payments directly online. It features real-time updates, secure transactions, and instant confirmation, enhancing the booking experience and streamlining the reservation process.

Features

- User friendly booking system
- Room and Amenities show
- Social Media Integration
- Online payment processing
- Attractive visual landing page

Online Booking

- Mobile friendly with unique user interface
- Booking system and online payment processing
- SEO
- Advert/Awareness

WELCOME TO THE HOTEL GROUP

Standard dummy text ever since the 1500s, when an unknown printer took a galley of Garamond type and set it as the specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining unchanged. It was popularised in the 1960s with the release of Letraset sheets containing random words and more recently with desktop publishing software.

OVER OUR DESTINATIONS

Our Distinctive Advantages

Explore our high efficient and flexible solutions.

01

Real Time Tracking

Real-time tracking offering instant operational visibility and monitoring.
